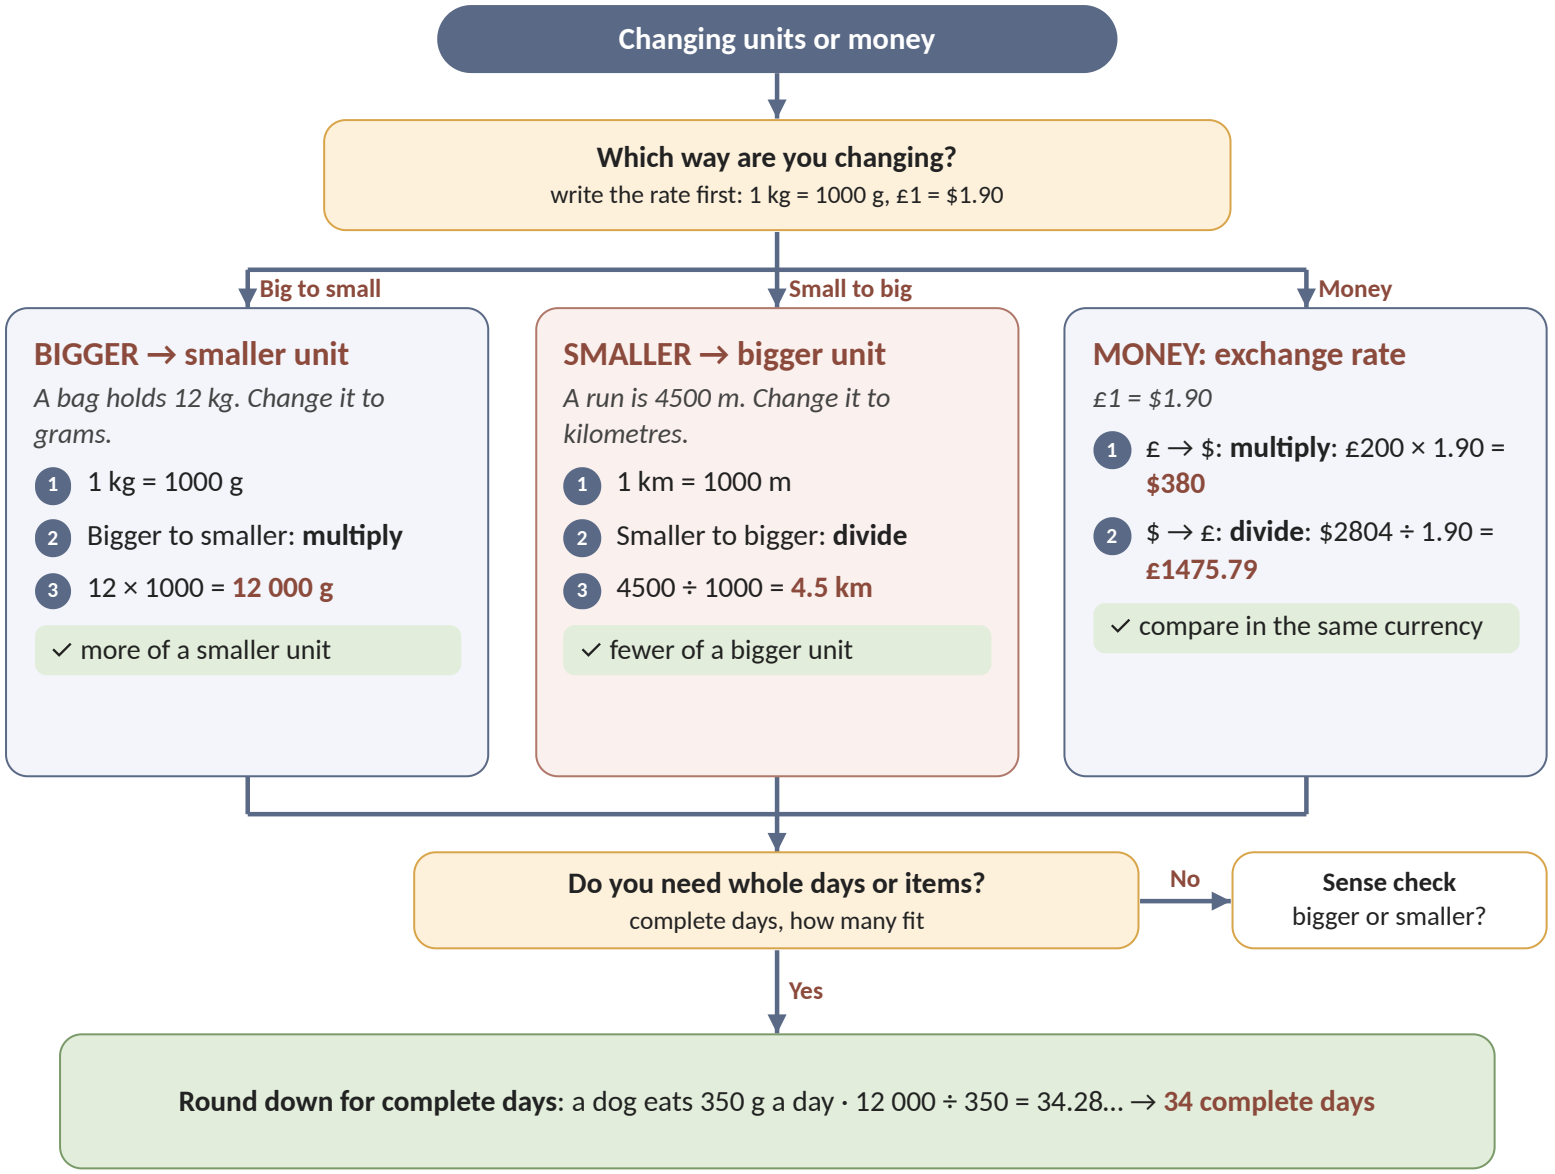
Converting units and money: flowchart

Extra topic and planner week 18 · Multiply or divide? Follow the arrows



The big question

Am I changing to a **smaller** unit (multiply) or a **bigger** unit (divide)?

Money: £ to foreign → × the rate. Foreign to £ → ÷ the rate.

Facts to learn

10 mm = 1 cm · 100 cm = 1 m · 1000 m = 1 km
1000 g = 1 kg · 1000 ml = 1 litre

Watch out

- Using 100 g in a kg (it is 1000 g).
- Multiplying when you should divide.
- Money: give 2 decimal places.
